Education

COMPUTER SCIENCE (B.S.) Orlando, FL
University of Central Florida. GPA 4.00. 2023
Summa Cum Laude.
Relevant Coursework: Senior Design, Intro to C, Security in Computing, Computer Logic & Organization, Discrete Structures.

INDUSTRIAL ENGINEERING (B.S.) Orlando, FL
University of Central Florida. GPA 4.00. 2022
Summa Cum Laude. Valedictorian.
Relevant Coursework: Senior Design, Cost Engineering, Production & Distribution, Systems Simulation, Human Engineering.

Experience

SOFTWARE ENGINEER Orlando, FL
United States Army Reserve February 2023 – November 2023

- Collaborated with thirteen developers to build a unified mobile and web application using Swift, Gradle, React, GitHub, and AWS, delivering a centralized platform for Army Reserve personnel.
- Designed and implemented a React-based user table that displayed structured soldier data and audit activity in a clear, user-friendly interface, improving visibility into system operations for internal users.
- Migrated thousands of production data records from Firebase Cloud Storage to AWS RDS for PostgreSQL, helping modernize backend infrastructure and improve database reliability and scalability.
- Authored and maintained Confluence documentation for developers, clarifying technical workflows, application updates, and system architecture to support team onboarding and cross-functional collaboration.
- Created Figma UI mockups with role-based permission logic, enabling privileged users to manage soldiers, units, budgets, and protected medical information through secure CRUD workflows.
- Established CI/CD pipelines using AWS SAM, CDK, Docker, and Git, streamlining testing and deployment processes and reducing deployment time by 23%.

QUALITY ENGINEER Orlando, FL
Regal Boats January 2022 – May 2022

- Led Lean process improvement initiatives, including 5S implementation, to streamline work areas, reduce repetitive motion, and minimize inefficient operations across the production line.
- Analyzed process variation and identified deviations from manufacturing standards, strengthening ISO 9001 compliance through improved SOPs and standardized quality procedures.
- Leveraged Six Sigma methods and statistical analysis in Excel, Minitab, and Python to optimize manufacturing takt times, increasing operational efficiency by 12% and reducing costs by 8%.
- Built Simio simulation models to evaluate work-in-progress, throughput, cycle times, and utilization rates, helping design more cost-effective manufacturing layouts and ergonomic workstations.

OPERATIONS RESEARCH INTERN Remote
U.S. Department of Homeland Security June 2021 – July 2021

- Developed Arena and Simio simulation models to evaluate queue lengths, service times, agent utilization, and checkpoint bottlenecks, helping improve airport checkpoint system design.
- Analyzed 1,000+ operational data points in Excel using pivot tables, Power Query, Power Pivot, and statistical models to identify trends and support process optimization efforts.
- Collaborated with operations specialists to assess resilient TSA checkpoint strategies, contributing to process improvements that reduced passenger wait times by 15%.

INSTRUCTION LEADER Orlando, FL
University of Central Florida January 2020 – April 2021

- Facilitated four weekly instructional sessions for Programming with C in both in-person and virtual formats, supporting 500+ students in core topics such as data structures, algorithms, recursion, dynamic memory, and file input/output.
- Collaborated with professors to align session content with course objectives, tracked student progress using Excel, and contributed to improved academic performance among consistently participating students.
- Designed and delivered a comprehensive final exam review by synthesizing material from the full semester.

Skills & Technical Proficiencies

Developer Tools: GitHub, Docker, Postman, Jenkins, Visual Studio, VirtualBox, Jira, Confluence
Technologies: React, React Native, Node.js, Expo, HTML5, CSS, PostgreSQL, Swift, Gradle
Languages: Python, JavaScript, Java, Go, C, C++, C#
Analytics & Business Tools: Excel, Tableau, Simio, Minitab
